PROJECT TITAN: TECHNICAL SPECIFICATION & ROADMAP
Document Version: 1.4 | Classification: Confidential
Author: Dr. Elena Rostova, Principal Systems Architect
Target Launch Date: September 15, 2025

1. Executive Summary
Project Titan is Acme Global Enterprise's next-generation distributed document intelligence and multimodal proc

2. Architecture & Infrastructure
- Primary Cloud Provider: Google Cloud Platform (GCP)
- Core Workloads: GKE Enterprise Kubernetes Cluster (us-central1 region)
- Storage Layer: Cloud Storage (gs://acme-titan-docs) with lifecycle archiving to Coldline
- Database: Managed PostgreSQL 15 for transactional metadata; Neo4j AuraDB for graph traversal
- Vector Embeddings: ChromaDB vector store running with cosine similarity metric

3. Team Structure & Key Personnel
- Principal Systems Architect: Dr. Elena Rostova
- Lead ML Engineer: Marcus Vance
- Data Engineering Lead: Sarah Jenkins
- Executive Sponsor: David Chen (Chief Technology Officer)

4. Key Milestones
- Phase 1 (Alpha DIP Engine): March 30, 2025
- Phase 2 (Knowledge Graph & RAG Hybrid Retrieval): June 15, 2025
- Phase 3 (Beta Customer Trials): August 10, 2025
- Phase 4 (General Availability Release): September 15, 2025
